

Symptoms:

- Outlook crashes immediately after launch.
- Event Viewer shows error in module *olmapi32.dll*.

Cause:

- Bug introduced in Windows 11 security patch KB500XYZ.

Resolution:

1. Uninstall patch KB500XYZ:
 - *Settings* → *Windows Update* → *Update History* → *Uninstall Updates*.
2. Block patch temporarily with *Show or Hide Updates* tool.
3. Wait for Microsoft re-release of fixed patch.

Alternative Workaround:

- Use Outlook Web App until fix available.
